

1 Where does the next sample belong?

SYNTHETIC DEMO

Checkpoint: next_row = 5

Epoch 7 · rows 0–4 complete

● **Sealed**

$b_0 + b_1 \cdot 8$ records

● **Volatile**

$k = 8, 9$ · repeat after reset

⊗ **Interrupted**

$k = 10$ · no completed sample

Restart: $q = 88$

$r = 5, k = 8 \rightarrow c = 7$

$(x, y) = (28, 30)$ mm

Entry reference: $c = 15$

$(60, 30)$ mm → anchor → $q = 88$

○ Not yet acquired

Anchoring establishes position.
